

**IN-LAB TIME: 1 WORKING DAY**

ADD maximum 2 working days for multiple art service combinations

**SPRAYED LACQUER**

Use sprayed lacquer as a protective coating on your finished prints. Sprayed lacquer is available in matte, semi matte and clear finishes. If you plan to do additional print finishing in your studio do not order sprayed lacquer. Due to the nature of clear sprayed lacquer this process requires 3 additional in lab days to complete.

**LACQUER COATING**

Use lacquer as a protective coating on your finished prints. Lacquer is available in clear or lustre finishes. If you plan to do additional print finishing at your studio, do not order lacquer coating.

**SPRAY TEXTURE**

Heavy pebble texture spray used as a protective coating to your finished prints, or to achieve an upscale look. Due to the nature of this process, 3 additional in-lab days are needed.

**MACHINE TEXTURE**

Choose linen or pebble texture to give your prints an enhanced look. These texture finishes can be used to change the appearance of your prints to offer various price points or to provide a texture to deter scanning of your copyrighted work.
